Interface Engineering Adds to Growing Staff

SACRAMENTO, CALIFORNIA Interface Engineering has been growing in the last year. The firm added several senior staff to its ranks and recently welcomed Robert Hurtado, PE. Mr. Hurtado joins Interface with 18 years of experience in the mechanical HVAC industry and 13 years designing plumbing systems. He comes to Interface from the City of Sacramento, where Robert was a Senior Mechanical Engineer in charge of Plan Review. “Robert’s deep knowledge of City and State codes will surely be an asset to our clients,” says Interface Principal Stuart Lindsay. “Because of his experience with the City of Sacramento, Robert brings a different perspective to the firm. We can pass on that experience and knowledge to our clients,” adds Mr. Lindsay.

Mr. Hurtado joins a seasoned team of engineering experts in Interface Engineering’s Sacramento office. The firm has a diverse portfolio including the design of educational facilities, commercial space, municipal facilities, and industrial facilities including ports, marinas and water treatment facilities. “Adding experienced senior staff, such as Robert Hurtado, adds to the depth of the firm and ultimately provides a greater service to our clients,” comments Mr. Lindsay.

Interface Engineering is a 40-year old full-service MEP firm distinguished by its breadth of specialty expertise and deep commitment to sustainable practices. Interface offers full-service mechanical, electrical and plumbing design services, along with specialty services in technologies design, lighting design, fire/life safety consulting, energy modeling, building commissioning and sustainable design. Interface has offices in Portland; Seattle; San Francisco; Sacramento and Abu Dhabi, UAE.
