Institute, 2004

**T**he Bridgeport Condominium development is comprised of two seven-story buildings, with a public/private courtyard between them. There are 123 traditional-style living units and 7,780 sf of ground floor retail space. Residential units range in size from 650 sf studios to 2,000 sf penthouses. Bay windows, beige brick and a curved north tower are the main features of the design.

Located in the Pearl District, the Bridgeport Condos are located adjacent to the streetcar and Tanner Springs Park.
