

Washington State University's Center for Teaching, Learning & Technology

PULLMAN, WASHINGTON

Services

Electrical
Building Technologies

FAST FACTS

Architect

Yost Grube Hall Architecture

General Contractor

Lydig Construction Inc.

Completion

January 2002

Building Size

95,000 sf

Project Cost

\$28 million

Prior to the merge with Interface Engineering, Graham & Associates provided electrical and information technology design services for this \$28M unconventional educational center, which promotes an interactive learning experience through its design. The 95,000-sf complex features 17 state-of-the-art flexible and innovative classrooms, walk-in tutorial services, study spaces, computer labs, a cyber café, and two auditoriums.

The addition to Washington State University provides innovative resources for teachers.
