Locations

Alaska
California
Maryland
Montana
Oregon
Washington

Interface has worked with Safeway for over thirty years on new construction, remodels, and additions to more than 200 locations nationwide. The stores average 25,000 - 60,000 SF in size, and often contain bakery, pharmacy, floral, and other non-grocery areas in addition to standard produce, dairy, and meat departments. Interface provides mechanical and electrical design services, including lighting, HVAC, power and other utilities, data and phone, and plumbing systems design. Interface has also provided design services for several of the new Safeway convenience stores.

Interface Engineering works with Safeway on multiple projects each year at stores nationwide.
