Craig Stockbridge, Project  
Manager / GBD Architects /  
503.224.9656

After a half-century in Prineville, the Les Schwab company relocated their corporate headquarters to Bend. With sustainability in mind, Interface was charged with designing high-performance building systems for the new office space.

The facility includes solar panels, and several water and energy conservation features. The entire building also utilizes raised floors for the HVAC system. Other services include electrical design, lighting, technology services and fire/life safety design.

Besides office space, the building contains conference facilities, kitchens, dining rooms, locker rooms, and a data center.
